One of the best's things you can do for your child now is to get your child coding for the 21st century! Why not join our new and upcoming after school coding club?

Why Code for our Year 1-2's?

They learn about online safety, digital skills, while getting to know about block programming in a range of exciting ways like identifying colors, numbers, shapes, counting and storytelling…

Why Code for our Year 3 – 4's?

Give your child the edge with basic computer knowledge along with block programming game design and robotics while learning to be innovative with the technology around them.

Why Code for our Y5 – 6's?

In this mixed ability class children with learn all about, internet safety, computer programming and coding in a range of fun ways, making computer games, Java programming and Python and to build their own websites.

Coding helps children develop academic skills, expand their horizon while building qualities like patience, preparation, perseverance, communication, collaboration, resilience and the organizational skills needed that can translate into any career into their future.
