

Our Values
Respect, Kindness, Resilience,
Integrity, Honesty and Trust

- Our Pledge**
- Listen and Learn
 - Do our best
 - Look after each other
 - Look after our school

Year 3 Newsletter Summer 1 2023

This term in Year 3 we have been learning how to write newspaper reports. We've been looking at lots of newspapers and identifying all the features. We then wrote our own newspaper reports based on the Iron Man, 'The Monstrous Metal Giant!'.

In Maths, we have been learning about measuring length and perimeter. We had a go at measuring lots of objects around the classroom and the school using rulers, measuring tape and meter sticks! We then learnt how to calculate the perimeter of a shape.

In Geography our topic has been 'Weather around the world', where we have been looking at the climates in different parts of the world. We each got to choose a country and did some research on the weather and climate of our chosen country. We even got to act as travel agents to find people suitable holidays!

In Science we have been learning about plants. Some of the things we have been learning about include; the life cycle of a flowering plant, types of seed dispersal and photosynthesis. We also really enjoyed our recent trip to the Science Museum where we got to visit the Wonderlab exhibition. We had a fantastic time having a go at testing out Science
